

### Powerful and noiseless pump

125 maximum psi, with 24 vdc adapter.

### RO Storage Tank

3.5 Gallons capacity, certified to the NSF/WQA standards.

### Forward Flash system

To wash membrane surface and remove up contaminants.

### Auto control pump

Equipped by a level switch to control storage tank.

### fluxtek pre-treatment

High quality material, certified to the NSF/WQA standards.

### Pipes and fittings

Sealed pipes for filter replacement comfortable.

### High Performance

Guaranteed to remove up to 99% of contaminants including arsenic, chlorine, lead, heavy metals, bacteria, virus and 1000+ contaminants.

#### FILMTEC Membrane

Capable to remove up contaminants 0.0001 microns.

### How does Reverse Osmosis System work to treat my water?

Our technology is the most advanced in the market and control the growth of fungus, bacteria and algae. Reverse Osmosis System 6 Stages removes sediment and rust particles. Also absorbs chemicals as: arsenic, lead and mercury. In addition, the system removes total dissolved solids (TDS).

Comes with 100% metal, 100% lead-free luxury designer faucet, plus FDA Certified JG Food grade tubing to provide safe, contamination-free pure water. The original, top-notch JG Quick Connect fittings for easy and secure leak-seal

<b>Treatment Process</b>		Pp filter, carbon Active and block filter, ,reverse osmosis ,post carbon filter,	
Energy usage	1.2 A - 24 VDC	Model	PRO- PH08
Operational pressure	3 - 4 bar	Contaminant removal rate	99.9%
Size	7 x 15 x 18 inches	Treatment accuracy	0.0001micron
Item weight	28 pounds	Water making rate	50%
